

# Call Attacks 1 - Who Is The Owner?!

---

## Intro

There are 2 smart contract: `UnrestrictedOwner`, and `RestrictedOwner`.

Anyone can take ownership on the first one (`UnrestrictedOwner`).

No one, except the current owner can take ownership on the second one.

You are not the current owner 😞

Your goal is to take ownership on the second smart contract (`RestrictedOwner`).

## Accounts

- 0 - Deployer
- 1 - User
- 2 - Attacker (You)

## Tasks

### Task 1

Take ownership on the `RestrictedOwner` smart contract.

You should be both `owner` and `manager`.
